# Walker Fraser Steele Chartered Surveyors

FLAT 1/2 1702 SHETTLESTON ROAD GLASGOW G32 9AW

## **Energy Performance Certificate (EPC)**

**Dwellings** 

# **Scotland**

#### FLAT 1/2, 1702 SHETTLESTON ROAD, GLASGOW, G32 9AW

Dwelling type: Mid-floor flat
Date of assessment: 10 November 2022
Date of certificate: 13 November 2022

Total floor area: 67 m<sup>2</sup>

Primary Energy Indicator: 248 kWh/m²/year

**Reference number:** 9703-1903-7209-0622-8200 **Type of assessment:** RdSAP, existing dwelling

**Approved Organisation:** ECMK

**Main heating and fuel:** Boiler and radiators, mains

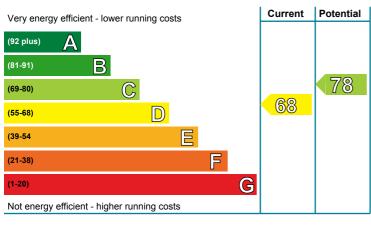

gas

#### You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£2,034	See your recommendations
Over 3 years you could save*	£699	report for more information

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

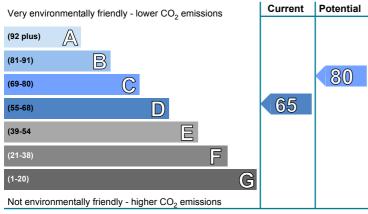

#### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (68)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide ( $CO_2$ ) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (65)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal or external wall insulation	£4,000 - £14,000	£516.00
2 Low energy lighting	£15	£69.00
3 Condensing boiler	£2,200 - £3,000	£117.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

#### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
	Solid brick, as built, no insulation (assumed)	****	***
Roof	(another dwelling above)	_	_
Floor	(another dwelling below)	_	_
Windows	Fully double glazed	<b>★★★☆☆</b>	***
Main heating	Boiler and radiators, mains gas	****	★★★★☆
Main heating controls	Programmer, TRVs and bypass	<b>★★★☆☆</b>	***
Secondary heating	Room heaters, mains gas	_	_
Hot water	From main system	****	<b>★★★</b> ☆
Lighting	Low energy lighting in 57% of fixed outlets	****	<b>★★★★</b> ☆

#### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 44 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 2.9 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

L-CE vv94.0.1.1 (SAP 9.94) Page 1 of 5

#### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£1,470 over 3 years	£879 over 3 years	
Hot water	£291 over 3 years	£264 over 3 years	You could
Lighting	£273 over 3 years	£192 over 3 years	save £699
Tota	ls £2,034	£1,335	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

#### Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Da	samman dad maaayyaa	Indicative cost	Typical saving	Rating after i	mprovement
Re	commended measures	Indicative cost	per year	Energy	Environment
1	Internal or external wall insulation	£4,000 - £14,000	£172	C 76	C 77
2	Low energy lighting for all fixed outlets	£15	£23	C 76	C 77
3	Replace boiler with new condensing boiler	£2,200 - £3,000	£39	C 78	C 80

#### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

Micro CHP

### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

#### 2 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting).

#### 3 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

#### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

#### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	5,599	N/A	N/A	(2,735)
Water heating (kWh per year)	1,967			

#### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by ECMK (www.ecmk.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Alan Hudson
Assessor membership number: ECMK302881

Company name/trading name: Walker Fraser Steele

Address: 27

WATERLOO STREET

GLASGOW G2 6BZ

Phone number: 07801301462

Email address: alan.hudson@walkerfrasersteele.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

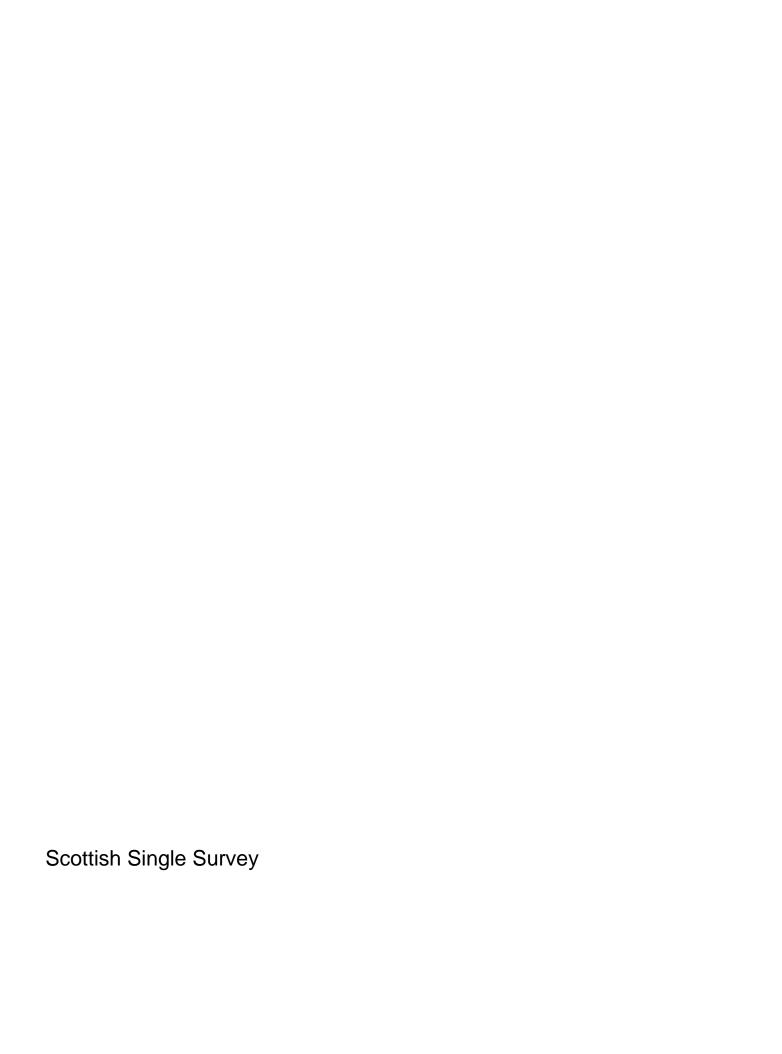

#### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

Customer	Mr & Mrs Massimo & Giovanna Martone
Customer address	
Prepared by	Walker Fraser Steele
Date of inspection	10th November 2022

Walker Fraser Steele Chartered Surveyors

#### PART 1 - GENERAL

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report <sup>2</sup> will be from information contained in the Report and the generic Mortgage Valuation Report.

<sup>&</sup>lt;sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

#### PART 2 - DESCRIPTION OF THE REPORT

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

#### **WARNING:**

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

#### 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

·	
Description	The subjects comprise a self-contained flat located on the first floor of a traditional four storey tenement block. There are 8 flatted dwellings in the block.
Accommodation	Entrance Vestibule, Entrance Hall, Living Room, Bedroom, Kitchen and Bathroom.
Gross internal floor area (m²)	67 sq.m.
Neighbourhood and location	The subjects are located in the Shettleston area of Glasgow, several miles to the East of the City Centre. Neighbouring residential property is of a similar tenemental style. There is a satisfactory range of residential amenities available in the area and good transport connections with the city centre.
Age	The building is estimated to be approximately 120 years old.
Weather	At the time of our inspection it was dry but very windy.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	Visible chimney stacks are of stone and rendered masonry construction and incorporate lead flashings.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	The roof is of a traditional pitched design and is overlaid with concrete tiles.

Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Rainwater conductors are formed with cast-iron fittings.
	1
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The outer walls are of red sandstone construction, lined internally with lath and plaster.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	Windows comprise uPVC framed double glazed units.
	The entrance door to the property comprises a two leaf timber storm door at the first floor landing and a single leaf timber framed internal door with glazed insert.
External decorations	Visually inspected.
External decorations	Visually inspected.  Cast-iron rainwater fittings are painted.
External decorations	
External decorations  Conservatories / porches	Cast-iron rainwater fittings are painted.

Ceilings	Visually inspected from floor level.
	Ceilings are formed with lath and plaster.
Internal walls	Visually inspected from floor level.
internal walls	
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal partitions are of solid brick construction, plastered on hard.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Floors are of suspended timber construction. Our inspection of floor surfaces has been restricted by the presence of floor coverings throughout.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	There is a range of doors, door facings and skirting boards throughout.
	The kitchen contains a range of wall mounted and base units.
[a	\
Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	The existent Constant and the extension of all the extension
	The original fireplaces have been removed although the chimneybreasts remain intact.
Internal decorations	chimneybreasts remain intact.  We note that there is a gas fire at the living room that has replaced the original fireplace. We are unable to confirm if this is operational and further enquiries should be made.
Internal decorations	chimneybreasts remain intact.  We note that there is a gas fire at the living room that has replaced the original fireplace. We are unable to confirm if this is
Internal decorations  Cellars	chimneybreasts remain intact.  We note that there is a gas fire at the living room that has replaced the original fireplace. We are unable to confirm if this is operational and further enquiries should be made.  Visually inspected.  Internal surfaces are papered and painted. Ceramic tiles and

	The electricity meter and fuse box are located in the hall cupboard.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  Mains supply.  The gas meter is located in the hallway just outside the bathroom door.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Mains supply.
	Visible pipework is formed with copper and plastic fittings.
	The bathroom contains a suite comprising; bath with mixer shower fitting, wash hand basin and a wc.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	There is a gas fired central heating system that incorporates water filled radiators. The boiler is located in the kitchen and is vented by means of a fan-assisted flue.
	Hot water is also supplied by the central heating boiler.
Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Drains are assumed to be connected to the public sewer.
Fire, smoke and burglar alarms	Visually inspected.
	No tests whatsoever were carried out to the system or appliances.
	For both new and existing homes, from February 2022 The Fire and Smoke Alarm Standard requires a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance such as a boiler, open fire or wood burner a carbon monoxide detector is also required. You can obtain further details from the Scottish

Government web site www.mygov.scot (search Smoke Alarm).
We note that smoke detectors, a heat alarm and a carbon monoxide detector are all installed.

#### Any additional limits to inspection

#### For flats / maisonettes

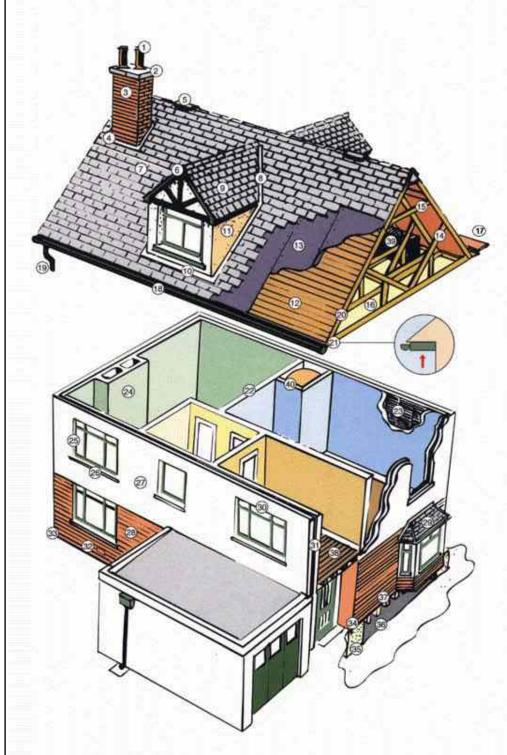

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

At the time of our inspection, the property was unoccupied and unfurnished, but floors throughout are fully covered.

#### 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	There are signs that the property has been affected by past structural movement as evidenced by cracks to external masonry and internal plaster finishes. So far as can be seen from this single inspection the movement appears to be long standing and does not appear to be progressive.  We note that structural repairs have been carried out to the building in the past and has involved the insertion of supporting metal bars beneath window lintels, the provision of steel bracing to bay window projections and the insertion of steel ties and spreader plated in line with the common close spine walls at the rear of the building. These work all appear to have been completed some time ago.

Dampness, rot and infestation	
Repair category	2
Notes	There is some isolated evidence of dampness at the rear wall in the kitchen. The area in question is located on the upper wall to the right of the window opening in the kitchen. There is also some discolouration noted at the ceiling immediately above the kitchen window opening. This could suggest that the dampness has been the result of a plumbing leak in the flat above. However, it would be prudent to have further investigations carried out in order to determine the nature and extent of any potential dampness issue.

Chimney stacks	
Repair category	1
Notes	No obvious defects noted although typical weathering of masonry is noted.

Roofing including roof space	
Repair category	1
Notes	Our inspection of roof surfaces has been limited to some extent by the configuration of the site. The visible roof coverings appear to be reasonably tidy, but we note that general weathering has taken place and some excess moss growth is visible at the front roof slope.

Rainwater fittings	
Repair category	1
Notes	Cast-iron downpipes and gutters are affected by normal weathering and some rust marking. They would benefit from being repainted in due course.

Main walls	
Repair category	1
Notes	The outer walls are generally in a condition that is consistent with age and type of construction. General weathering has taken place and hairline cracks are visible. Some repointing is required in places. As indicated previously there have been structural repairs carried out in the past and structural steelwork has been applied to the outer walls as part of these repairs.

Windows, external doors and joinery	
Repair category	1
Notes	Double glazed window units appear to have been adequately maintained.

External decorations	
Repair category	2
Notes	Paintwork to external timber fittings is weathered and peeling and requires overhaul. This is likely to be considered to be a communal item.  Paintwork to cast-iron fittings is weathered and rust marked and will required to be repainted in due course.

Conservatories/porches	
Repair category	-
Notes	Not applicable.

Communal areas	
Repair category	2
Notes	As indicated above, the windows at the common close require to be repainted.
	Paintwork to the common stairwell is also in need of overhaul.

Garages and permanent outbuildings	
Repair category	-
Notes	Not applicable.

Outside areas and boundaries	
Repair category	1
Notes	The garden areas to the front and rear of the building have been adequately maintained.

Ceilings	
Repair category	2
Notes	There are some plaster repairs required to the ceilings. Cracks are visible in a number of positions and cosmetic overhaul will be required.  There is also some staining at the kitchen ceiling which is indicative of a plumbing leak in the flat above. This does not appear to be new and it is likely that any such issue has now been dealt with.

Internal walls	
Repair category	2
Notes	Internal walls are in acceptable condition although some differential movement between partitions has resulted in several cracks. These should be filled and cosmetic repairs carried out.

Floors including sub-floors	
Repair category	1
Notes	Floors are noted to be uneven in places. This seems to be consistent with the degree of structural movement that has affected the building in the past.

Internal joinery and kitchen fittings	
Repair category	2
Notes	Internal joinery fittings are affected by typical wear and tear.  The kitchen units are of a somewhat dated style and are affected by excessive wear and tear.

Chimney breasts and fireplaces	
Repair category	1
Notes	There are no obvious defects noted at the chimneybreasts.  The gas fire has not been tested as this is not in our remit. It appears that an attempt has been made to block the vent and presumably this indicates that the fire is not operational, but this should be confirmed. In any event, if there is an intention to use the gas fire it would be prudent to have a gas safety inspection carried out in early course as a precaution.

Internal decorations	
Repair category	2
Notes	Internal decorations are generally acceptable, but have a dated appearance and are slightly worn in places. Some cosmetic repairs are also required.

Cellars	
Repair category	-
Notes	Not applicable.

Electricity	
Repair category	1
Notes	The electrical system has not been tested as this is outside our remit however, we are aware that an Electrical Safety Certificate was issued in respect of the property in 2021 indicating that the system was in a safe condition at that time. Nevertheless, would suggest that it would be prudent to follow guidance set out by the Institute of Electrical Engineers advising that domestic electrical installations should undergo a safety test every 5 years or at a change of ownership.

Gas	
Repair category	1
Notes	There are no obvious issues noted in respect of the gas installation. However, it would be prudent to have a safety test carried out in early course and then annually thereafter.

Water, plumbing and bathroom fittings			
Repair category	1		
Notes	There are no obvious defects noted to be affecting the visible plumbing apparatus.		
	The bathroom suite is of an older style. It is generally in acceptable condition, but wear and tear consistent with normal use is noted.		

Heating and hot water				
Repair category	1			
Notes	The heating system has not been tested as this is outside our remit. No obvious defects have been noted, but it would be prudent to have the boiler serviced in early course and then annually thereafter.			

Drainage	
Repair category	1
Notes	There are no obvious issues noted in respect of the foul or surface water drainage systems.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	1
Roofing including roof space	1
Rainwater fittings	1
Main walls	1

Outside areas and boundaries	1
Ceilings	2
Internal walls	2
Floors including sub-floors	1
Internal joinery and kitchen fittings	2
Chimney breasts and fireplaces	1
Internal decorations	2
Cellars	-
Electricity	1
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

#### **Category 3**

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

#### Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

#### Category 1

No immediate action or repair is needed.

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

#### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. Accessibility information

#### Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

#### Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	First
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

#### 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

The property is assumed to be held in 'Absolute Ownership' and unaffected by any onerous burdens or title restrictions.

#### Estimated reinstatement cost for insurance purposes

£260,000 (Two Hundred and Sixty Thousand Pounds)

#### Valuation and market comments

£95,000 (Ninety Five Thousand Pounds)

The valuation reflects the current condition of the property. Prevailing market conditions in the local area have also been considered.

# Mortgage Valuation Report

#### **General Remarks**

The subjects comprise a self-contained flat located on the first floor of a traditional four storey tenement block.

The subjects are located in the Shettleston area of Glasgow, several miles to the East of the City Centre.

There are signs that the property has been affected by past structural movement as evidenced by cracks to external masonry and internal plaster finishes. So far as can be seen from this single inspection the movement appears to be long standing and does not appear to be progressive.

We note that structural repairs have been carried out to the building in the past and has involved the insertion of supporting metal bars beneath window lintels, the provision of steel bracing to bay window projections and the insertion of steel ties and spreader plated in line with the common close spine walls at the rear of the building. These work all appear to have been completed some time ago.

There is some isolated evidence of dampness at the rear wall in the kitchen. The area in question is located on the upper wall to the right of the window opening in the kitchen. There is also some discolouration noted at the ceiling immediately above the kitchen window opening. This could suggest that the dampness has been the result of a plumbing leak in the flat above. However, it would be prudent to have further investigations carried out in order to determine the nature and extent of any potential dampness issue.

The building is generally in a condition that is typical of its age and construction. The common fabric of the building will require some attention in the foreseeable future. Internally the property would benefit from some cosmetic maintenance and modernisation.

#### **Note for sellers**

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

#### Information to be given to prospective buyer(s)

1.	Length of ownership
	How long have you owned the property? 18 years
2.	Council tax
	Which Council Tax band is your property in? (Please circle)
	(A) B C D E F G H
3.	Parking
	What are the arrangements for parking at your property?
	(Please tick all that apply)
	• Garage
	Allocated parking space
	• Driveway
	Shared parking
	On street
	Resident permit
	Metered parking
	Other (please specify):
4.	Conservation area
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	<del>Yes</del> / No
6.	Alterations/additions/extensions	
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?  If you have answered yes, please describe below the changes which you have made:	<del>Yes</del> / No
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?  If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.  If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	<del>Yes</del> / <del>Ne</del>
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?  If you have answered yes, please answer the three questions below:	<del>Yes</del> / No
	(i) Were the replacements the same shape and type as the ones you replaced?	<del>Yes</del> / <del>No</del>
	(ii) Did this work involve any changes to the window or door openings?	<del>Yes</del> / <del>No</del>
	(iii) Please describe the changes made to the windows, doors or patio doors (vidates when the work was completed):	vith approximate
	Please give any guarantees which you received for this work to your solicitor or e	estate agent.

7.	Central heating	
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	Yes / <del>Ne</del> / <del>Partial</del>
	If you have answered yes / partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).	
	Gas Fired	
	If you have answered yes, please answer the three questions below:	
b.	When was your central heating system or partial central heating system installed?	Approximately 15 years ago
c.	Do you have a maintenance contract for the central heating system?	<del>Yos</del> / No
	If you have answered yes, please give details of the company with which you have a maintenance contract:	
d.	When was your maintenance agreement last renewed? (Please provide the month and year).	
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes / <del>Ne</del>
9.	Issues that may have affected your property	
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	<del>Yos</del> / No
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	<del>Yos</del> / <del>No</del>
b.	Are you aware of the existence of asbestos in your property?	<del>Yes</del> / No
	If you have answered yes, please give details:	

10.	Service	es				
a.	Please tick which services are connected to your property and give details of the supplier:					
		Services	Connected	Supplier		
		Gas / liquid petroleum gas	✓	Unknown		
		Water mains / private water supply	✓	Unknown		
		Electricity	✓	Unknown		
		Mains drainage	✓	Unknown		
		Telephone				
		Cable TV / satellite				
		Broadband				
b.		e a septic tank system at your ave answered yes, please		estions below:	<del>Yos</del> / No	
c.	(i) Do y	ou have appropriate conse	nts for the discha	rge from your septic tank?	Yes / No / Den't knew	
d.	(ii) Do y	you have a maintenance co	ntract for your sep	otic tank?	Yes / No	
	If you I have a	nave answered yes, please maintenance contract:	e give details of th	ne company with which you		

11.	Responsibilities for Shared or Common Areas	
a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	<del>Yes</del> / No / <del>Den't Knew</del>
	If you have answered yes, please give details:	
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?	Yes / No / Not applicable
	If you have answered yes, please give details:	
	Factor hacking Paterson	
c.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	<del>Yes</del> / No
d.	Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries?	<del>Yes</del> / No
	If you have answered yes, please give details:	
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	<del>Yes</del> / No
	If you have answered yes, please give details:	
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	<del>Yes</del> / No
	If you have answered yes, please give details:	
12.	Charges associated with your property	
a.	Is there a factor or property manager for your property?	Yes / No
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	
	Hacking Paterson	

b.	Is there a common buildings insurance policy?	Yes / No /
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	Yes / No / Don't Know
C.	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.	
13.	Specialist works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	<del>Yes</del> / No
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property:	
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	<del>Yes</del> / No
	If you have answered yes, please give details:	
c.	If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?	Yes / No
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.	
	Guarantees are held by:	

	Guarantees
